

EMC TESTING AND ENGINEERING SERVICES

QAI Laboratories has added to their large scope of testing capabilities a new EMC/EMI department providing complete electromagnetic compatibility testing for FCC/IC/CE.

PRE-SCANS:

All pre-scans will be performed in our 3m Semi-Anechoic Chamber. There are many advantages for testing in Semi-Anechoic Chamber, including accurate data, repeatable results and controlled environmental conditions.

EMMISSIONS:

The Final Emissions will be completed at our state of the art 10m Open Air Test Site.

CAPABILITIES:

QAI has the full ability to perform Emissions and Immunity for all electronics manufacturing including Industrial, Scientific, Medical, Information Technology, Telecom, Wireless, Automotive, Marine and Avionics.

WIRELESS:

FCC – USA
IC – Canada
CE – Europe
and the International market.

NON-WIRELESS:

FCC – USA
IC – Canada
CE – Europe
and the International market.

VCCI – Japan
ACMA – Australia
TMC - China
